

## Prairie Song

D. Weatherhead

Verse 1                    Gm Cm                    Gm                    Cm                    Dm D  
Prairie sky,    moon down low. Stretchin' 'cross,    stars aglow.  
                         Gm Cm                    Gm                    Eb Dm                    Gm  
Through the night,    turning slow. 'Til the dawn, fades the show.

Verse 2                    Gm Cm                    Gm                    Cm                    Dm D  
Shifting winds,    changing sky. Rain or snow,    clouds or shine.  
                         Gm Cm                    Gm                    Eb Dm                    Gm  
The wind it blows    all the time. It's becoming    a friend of mine.

Chorus 1                    A Bb                    C Eb                    Gm                    Bb                    C                    Gm  
Breathe it in.    Let me feel what it's feeling. Part of the wholeness of one.  
A Bb                    C                    Eb                    Gm                    Ab                    Eb                    Dm                    Gm  
Let us be together as one in the many. My prairie heart, sings this song.

Verse 3                    Gm Cm                    Gm                    Cm                    Dm D  
Prairie walk,    gentian blue. Lift us high,    can't believe it's true.  
                         Gm Cm                    Gm                    Eb                    Dm                    Gm  
But there it is,    didn't think I'd see prairie blossom so blue, so deep.

Solo                    Gm Cm Gm, Gm Cm Dm D, Gm Cm Gm Eb Dm Cm Gm

Verse 4                    Gm Cm                    Gm                    Cm                    Dm D  
Prairie home,    shelter true. When it's hot,    keep us cool.  
                         Gm Cm                    Gm                    Eb                    Dm                    Gm  
And when it's cold,    warm we'll be, as we close our eyes and go to sleep.

Chorus 2                    A Bb                    C                    Eb                    Gm                    Bb                    C                    Gm  
Drift away, listen to the lullabies.    Playin' all through the night.  
A Bb                    C                    Eb                    Gm  
And through the day birds sing songs of hope.  
                         Ab                    Eb                    Dm                    Gm                    Ab                    Eb                    Dm                    Gm  
This prairie song fills my heart. This prairie song fills my heart.  
                         Ab                    Eb                    Dm Dm7 G  
This prairie song, fills my heart.
